
28th International Conference on Statistical Physics(Statphys28)

August 7-11,2023, in Tokyo, Japan

Sponsorship Prospectus

Organizing Committee of the Statphys28

Message from the Statphys28 Chair

We are very pleased to announce that the 28th IUPAP International conference on Statistical Physics, Statphys28 will take place in Tokyo from August 7 to 11, 2023, after a one-year postponement. The community of research scientists in Statistical Physics meets every three years at the STATPHYS Conferences, organized under the sponsorship of the IUPAP. These are the largest general meetings in Statistical Physics ; an occasion when both the latest advances of this science in its traditional domain and the new developing trends in other related fields are examined. However, the whole world is facing a difficult situation, and international travel is restricted due to the COVID-19 crisis. Considering this situation, Statphys28 will be held as a hybrid of an on-site conference at the University of Tokyo and an online conference using a web conference system.

The conference will cover a wide range of topics, including traditional aspects of statistical mechanics, non-equilibrium physics, turbulence and nonlinear dynamics, disordered systems and phase transitions, hard and soft condensed matter, as well as modern applications including information theory, quantum systems and mathematics. Statphys international conferences have been held as follows: Buenos Aires (2019), Lyon (2016), Seoul (2013), Cairns (2010), Genova (2007), Bangalore (2004), Cancun (2001), Paris (1998), Xiamen (1995), Berlin (1992), and Rio de Janeiro (1989).

In addition to the main event, a series of satellite meetings will be staged in the period preceding and following the conference.

Tetsuo Deguchi

On behalf of the Steering Committee and the LOC of Statphys28.
